### **2025-1 Mid-year Loss Development Exhibits – Motorcycles and ATVs**

The review of the Alberta 2025-1 Loss Development Exhibit for Motorcycles including All Terrain Vehicles (AUTO7503-AB) detected a significant decrease in the number of claims and incurred losses. Investigation revealed issues with reporting of this data by a major insurer.

The missing data is estimated at approximately 50% for Alberta, therefore, given the material impact on the exhibit, the Alberta Automobile Insurance Board has made the decision to not publish the 2025-1 AUTO7503-AB. The missing data in the Atlantic exhibits was varied, but in some cases also reached approximately 50%. Following discussions with the Atlantic regulators, they have decided not to publish the AUTO7503-ATL.

The impact to the Ontario exhibits was deemed minimal and so the Financial Services Regulatory Authority of Ontario has made the decision to proceed with publishing the AUTO7503-ON, and AUTO7513-ON.

GISA is working with the insurer to rectify reporting issues before any 2025-2 exhibits are published.
